What can I say about this game? After an eternity on my wishlist I bought it on sale somewhere in september 2017. And today, after almost 2 years and around 18 hours I finally got the last achievement and completed it 100%.

The only thing I can say, if you like drift modes in racing games like I do and have a controller at hand, you will love this game. It has a beautiful artstyle, a wonderful soundtrack and a zen-like gameplay. Yes it is hard in the beginning. But after sometime and getting use too, you enter a zen-state where only you, the car and the drift exists.
